Projects Summary

Project#1

Title: OAM (OMNI Archive Manager)

Technology: HTML5, CSS3, JSON, JavaScript, React JS, Redux.

Description: OAM archives, verifies, compresses, encrypts, indexes, and extracts structured and unstructured data from an organization to provide a full data management system for regulatory compliance. OAM provides search capability, query engine, and workflow interfaces. OAM is built for data archiving and data management for the purpose of helping companies become and remain compliant.

Responsibilities:

- Built single-page applications with JavaScript on a React JS Library with great user interface.
- Worked with agile team to migrate legacy website to React JS, CSS, HTML5
- Followed Agile Methodology and have working experience with JIRA, Version control tool Bitbucket.
- Implement Redux form module for effective form management.
- Developed Unit Test Cases for Applications using Jest.
- Switched multiple page views by using Routing concepts in React.
- Configured ES lint, Sonar lint for knowing code smells, duplications in code and vulnerabilities in code before it gets pushed to GitHub
- Worked on Fetching and uploading data using Axios

Project#2

Title: Medmate

Role: Front End Developer

Technology: HTML5, CSS3, JSON, JavaScript, React JS, Redux

Description: Medmate makes it really simple for patients all over Australia to access online doctors from the convenience and safety of their homes. It's really easy to use. You can access prescription medication renewals and express online consultations for a range of common medical conditions including depression, anxiety, UTI, women's health and diabetes. We can get instant virtual care when and where you need it.

Responsibilities:

- Built single-page applications with JavaScript on a React JS Library with great user interface.
- Worked with agile team to migrate legacy website to React JS, CSS, HTML5
- Followed Agile Methodology and have working experience with JIRA, Version control tool Bitbucket.

- Implement Redux form module for effective form management.
- Switched multiple page views by using Routing concepts in React.
- Worked on Fetching and uploading data using Axios
